

# Preparation for Tuesday's Workshop

- We will be using a notebook for our coding portion (.ipynb file).
- This should be shared with you. It's also on my Github (*danykakbyrnes*).
- Please see the README in the folder for instructions on set up.
- You can use Jupyter or Google collabs, but please set up the environment before the workshop.

This is my local file set up.  
Yours should look similar.
